

## iScaf™ Version 5 Product Comparison Summary

Feature	iScaf/Lite	iScaf
Print Parts List	Yes	Yes
Print Rental or Sale Quotation	Yes	Yes
Print Labour Quotation	Yes	Yes
Multiple Scaffold Walls	Yes	Yes
Draw Building Perimeter	Yes	Yes
Arcs, Tanks, Birdcages	Yes	Yes
Show Scaffold Perimeter	Yes	Yes
Print Full Plan Drawing	Yes	Yes
Print Full 3D Scaffold Model	Yes	Yes
Large Plotter Support	Yes	Yes
Import Drawing	Yes	Yes
<b>Technical Information</b>		
Requires AutoCAD License	No	Yes
AutoCAD Functionality	2004	2000 to 2007
AutoCAD Drawing Compatible	2007	2000 to 2007
3-D Editing & Manipulation	Limited	Yes
User defined blocks	Yes	Yes
Digitizer / Scanner Support	Yes	Yes
AutoCAD Command line	Very Limited	Yes
Ability to repeat last command	Yes	Yes
True 32 Bit Technology	Yes	Yes
Speed Rating	9.5	10

The differences between the products are summarised in the above table:

### [iScaf/Lite™](#)

**iScaf Lite™** is a scaffold design product which contains all of the functionality required to draw professional scaffold drawings enabling you to prepare plan, 3D and section drawings for walls, buildings and tanks to produce a full material list including weights. **iScaf Lite™** can also import external architectural drawings and plot to any paper size. **iScaf Lite™** does not require a copy of AutoCAD as Scaftech has made arrangements with AutoDesk (the developers of AutoCAD) to license the required AutoCAD 2004 functions within the **iScaf Lite™** product. The AutoCAD command prompt is not available in **iScaf Lite™**.

### [iScaf™](#)

**iScaf™** contains all the functions of **iScaf/Lite™** and is beneficial for experienced users of AutoCAD. The full version of **iScaf™** runs with the full AutoCAD program allowing you to use all of the power of AutoCAD directly on your drawings as they are generated by **iScaf™**. The AutoCAD license will need to be purchased separately and will need to be installed prior to the installation of **iScaf™**. The main difference between **iScaf™** and **iScaf/Lite™** is that **iScaf™** provides the full availability of the AutoCAD command prompt for experienced CAD users. If your company already has employees with AutoCAD experience, then **iScaf™** may be your preferred product.

**iScaf/Lite™** can be upgraded to **iScaf™** if required.
